

# Brisas del Pinal Potable Water Project

# Area of focus:

**Providing  
clean water  
,Sanitation  
and hygiene.**

# Participants:

# ABOUT THE PROJECT

In the Northwest of **Honduras** is the second poorest department of this country, called **Santa Bárbara** and in the municipality of Santa Bárbara of this same department is the community of **Brisas del Pinal**, inhabited by 511 people of all ages, grouped into 127 families, people who are hardworking, dedicated and enterprising.

They have collected economic funds with a lot of effort and dedication, to carry out a technical study that intends to bring water by gravity to their community at a distance of 7.36 kms from the water source called **Rio Chiquito** with a flow of 30.36 gallons of water per minute.

With this project, **127 families will benefit**, who have to face day by day to walk in order to obtain water from a stream that is contaminated and causes many of the community's neighbors to **suffer from intestinal and respiratory diseases** very often and when faced with this pandemic are even more susceptible to
